The Perfect Image - From a Small, Sleek, Sharable Resource

For powerful presentation projection on the move, Christie's LX25 is the perfect resource to depend on. Weighing just 6.4 lbs and delivering 2500 ANSI lumens, the LX25 is ideal for smaller boardrooms, meeting rooms, breakout rooms and classrooms – or anywhere you need a bright, high-impact presentation on the go.

The LX25 is a 3-panel LCD projector that's lightweight, low profile and absolutely able to perform – with a native XGA resolution, scalable up to SXGA and a 400:1 contrast ratio, this dynamo projector provides dynamic displays with crisp, detailed images. The compact design makes it easy to share between groups, facilities or, to take on the road for high-impact presentations. The short-throw lens is perfect for large images when space is limited, such as at the front of a classroom or meeting room. A convenient, onboard pointer system on the projector lets you highlight key items in your presentation.

Latest progressive-scan video electronics provide detailed, artifact-free images for brilliant presentations. For maximum flexibility, the LX25 offers front, rear and ceiling mount orientations that let you place the projector wherever needed. Multiple inputs and outputs let you connect to virtually every source on the market and the dual mode HD15 connector can be configured for local monitoring. Horizontal and vertical digital keystone places a perfectly square image on the screen, regardless of your environment challenges.

Christie's optional ChristieNET™ connects the LX25 to a TCP/IP network for monitoring and control of the LX25, independently or on your network.

Best of all, this performance power is easy to use. You can set up the LX25 straight out of the box in a matter of minutes. Single press menus with direct control for quick access to key functions and an intuitive graphical user interface make navigation simple. A user-definable start-up screen lets you make an impression immediately.

Compact and ultra-portable for presentations with punch.

Features

- High brightness 2500 ANSI lumens for consistent image clarity for demanding video applications
- Progressive-scan electronics with automatic 3:2 pull-down for crisp video reproduction
- Lightweight and compact — low profile installations and portability for use as shared asset
- XGA native resolution with scaling for VGA to SXGA for connection to most computers/laptops
- Short-throw lens for large images—perfect for classrooms and small conference rooms
- Lightweight at 6.4 lbs and compact, the LX25 is easy to share between groups.
- 1500 hours lamp life and superior standard 3 year warranty
- Auto set-up and onscreen display, direct key access and single press menus
- Dual mode input/output HD15 connector offers local monitoring.

- Intuitive GUI, single-press menu options
- Projected image/user-definable logo
