Project Your Best Image™

The Christie Vivid LX33 is a perfect solution for mid-sized installations in boardrooms, meeting rooms and classrooms. Providing brightness and installation flexibility in a competitive package, with optional ChristieNET™ network connectivity, the Vivid LX33 is the perfect integration solution.

The LX33 delivers 3300 ANSI lumens from a whisper-quiet package operating at only 35dBA in economy mode. Offered in a lens-less configuration, you select the right lens for the application. Vertical lens shift and digital keystone correction provides picture-perfect placement of your image. Input compatibility ranges from analog and digital RGB data up to SXGA resolution and video sources from composite through 1080i HDTV. Sophisticated digital image processing ensures the images you see on screen are bright, crisp and free of noise and distortion.

At home as a fixed installation projector or a shared resource moved from across campus and between offices, the LX33 delivers high performance and low cost of ownership.
