Project Your Best Image™

Incredible power - incredible resolution performance.

Vivid White uses a four lamp illumination system providing the ultimate in failsafe operation. The same system permits the user to choose between a staggering 7700 ANSI lumens (quad lamp mode) or a more conservative 3850 ANSI lumens (dual lamp mode) - offering a level of projection power normally reserved for staged events.

Vivid White offers professional presenters native UXGA resolution (1600 x 1200) without compression. The Vivid White renders the most finely detailed images effortlessly, whether generated from the draughtsmans' board or state-of-the-art CAD/CAM software.

Vivid White incorporates an extensive feature-set, delivering unrivalled control and connectivity in a digital age. An integral Digital Visual Interface (DVI-D) and compatibility with both DTV and HDTV, allows you to project the highest quality sources. Digital keystoneing, lens shift (in two axes), image elevation control and PC "total dot" adjustment permit the presenter to perfectly project and position both video and data content.

An intuitive on-screen display menu and control via remote control or direct-key access gives the professional presenter full control over the projector's motorized zoom and focus functions and with features such as digital magnification, picture freeze and a 'no-show' mode - full control of the presentation too.

Vivid White, ultimate power - ultimate performance.

Features

- 7700 ANSI lumens maximum
- 4 lamp system - quad or dual lamp mode
- Lamp redundancy and failsafe operation
- True UXGA resolution (1600x 1200)
- Digital Visual Interface (DVI)
